## LYNX Technik AG® Launches 3 GHz 1x6 "Yellobrik" SDI Distribution Amplifier

**NAB 2009 – March 16, 2009 – Weiterstadt, Germany --** LYNX Technik AG will launch their new "Yellobrik" 3 GHz SDI Reclocking Distribution Amplifier at their **NAB Booth C1628**.

The D VD 1606 is a brick-style 3GHz 1x6 SDI distribution amplifier that has been designed to pass all SDI signal standards from 270 Mb/s up to 3 Gbit/s. This compact unit auto-detects one SDI input signal and distributes it to six isolated outputs without signal degradation. The input signal is reclocked and equalized before being transmitted to the separately buffered outputs. With its miniature brick-style size and affordable price, this feature-packed unit is ideal for a large variety of applications.

This innovative little nugget is part of LYNX Technik's new "Yellobrik" line of standalone brick signal processing products. All new "Yellobrik" modules meet the rigorous demands of broadcasting environments and provide the tools necessary to span the full spectrum of professional AV applications.

### Availability:

Yellobrik D VD 1606 will be available in May

### About LYNX Technik:
